Student User Guide · Version 1.0 · July 2026

Version 1.0 · July 2026

Welcome! This short guide walks you through everything you can do as a learner: finding and taking courses, live sessions, exams, certificates, and keeping your learning streak alive.

1. Getting Started

1.1 Creating your account

- If you received an **invitation email**, click the link and set your password — you'll land directly in your academy.
- Otherwise open the platform URL and choose **Register**. After signing up, check your inbox for a verification email and click the link (you can resend it from the banner in the app).

1.2 Logging in

Sign in with your email and password. If your academy has enabled two-factor authentication you'll also enter a 6-digit code from your authenticator app.

1.3 Your dashboard

Your home screen shows: - courses you're enrolled in, with progress bars - your **learning streak** (consecutive active days) and points - badges you've earned and the leaderboard - upcoming live sessions you've RSVP'd to

2. Finding & Enrolling in Courses

2.1 The catalog

Browse the **Catalog** for your academy's published courses. Each card shows the description, estimated duration and price (if any). The **Marketplace** may also show courses from partner academies.

2.2 Enrolling

- **Free courses** — click Enrol and start immediately.

- **Paid courses** — click Enrol and complete the secure checkout. Your access activates as soon as payment is confirmed. Your receipts and subscription status are available under **Billing**.

2.3 Learning paths

If your academy uses **Learning Paths**, courses are arranged in a sequence — finish one step to unlock the next. Your position on the path is always visible.

3. Taking a Course

3.1 The course player

Courses are made of slides. Use the arrows (or arrow keys) to move through them; your progress is saved automatically, so you can leave and pick up exactly where you stopped. Some slides include audio narration — press play to listen.

3.2 The AI Tutor

Stuck on a concept? Click **Ask AI Tutor** inside any course. The tutor answers using your academy's course materials and shows citations for where the answer came from. Your conversation history is saved per session; only you can see it.

Privacy note: any personal information in your questions is automatically redacted before the question is processed by the AI.

3.3 Flashcards

If your course has flashcards, you'll find them under **Flashcards**. The review scheduler shows you each card just before you're about to forget it (spaced repetition). You can also save useful AI Tutor answers as flashcards with one click.

4. Live Sessions

- **RSVP** to upcoming sessions from the course page or the sessions list. If the session belongs to a course you're not enrolled in yet, you'll be enrolled automatically when you RSVP.
 - **Recurring series** — RSVP once for the whole series or per occurrence.
 - **Calendar** — subscribe to your personal calendar feed (ICS) so sessions appear in Google/Apple/Outlook calendars, or download individual invites.
 - **Reminders** — you'll get an email reminder before each session you've RSVP'd to.
 - **Attendance** — your instructor marks attendance; attending can earn you an attendance certificate automatically.
-

5. Exams & Certificates

5.1 Taking an exam

When you finish the slides, take the course assessment. Note: - exams may have a **time limit** — the timer is visible throughout - you have a limited number of **attempts** (shown before you start) - you need the **passing score** (e.g. 70%) to earn your certificate

Your results appear immediately after submission.

5.2 Your certificates

Pass an exam (or attend a qualifying session) and your certificate is issued automatically, branded by your academy. From **Certificates** you can:

- **Download the PDF** — includes a QR code for instant verification
 - **Share** — every certificate has a public share page that renders a rich preview on LinkedIn and Twitter/X
 - **Verify** — anyone with the link (or QR scan) can confirm your certificate is genuine, without needing an account
-

6. Streaks, Points & Badges

- **Streak** — any meaningful activity (slides, exams, flashcards) keeps your daily streak alive. We'll email you a nudge if your streak is about to break.
 - **Points** — earned for completing slides, exams and sessions.
 - **Badges** — awarded automatically as you cross point thresholds set by your academy.
 - **Leaderboard** — see how you rank against other learners in your academy.
-

7. Your Account

- **Profile & password** — change your password anytime under Settings. If you forget it, use "Forgot password" on the login page.
- **Two-factor authentication** — optionally protect your account with an authenticator app; recovery codes are provided at setup.
- **Notifications** — opt in/out of digest and reminder emails under **Preferences**.
- **Terms & Conditions** — if your academy publishes new terms you'll be asked to accept them before continuing.
- **Your data (GDPR)** — you can request an export of your data, or account erasure. Erasure anonymises your personal details while keeping issued certificates verifiable.

8. FAQ

My progress didn't save? Progress saves automatically per slide. Check your connection and reopen the course — you'll resume at the last slide you completed.

I failed the exam. Can I retry? Yes, up to the attempt limit shown on the exam start screen. Review the slides and flashcards before retrying.

My certificate link shows "revoked". Certificates can be revoked by your academy (e.g. issued in error). Contact your academy administrator.

I didn't get the verification / invitation email. Check spam, then use the resend button. If it still doesn't arrive, ask your administrator — they can copy your invite link directly from their console.

Who can see my AI Tutor questions? Only you. Sessions are private to your account, and personal information is redacted automatically before AI processing.
