

IFPI Learning Platform

Student User Guide · Complete first-time walkthrough · Updated 1 August 2026

Version 3.0 · July 2026 — Complete first-time walkthrough

This is a step-by-step manual for learners on the International Fitness Professionals Institute learning platform. It assumes you have never used the platform before. Every instruction refers to the exact buttons and menus you will see.

1. What You Need

- A modern browser (Chrome, Edge, Firefox or Safari) on computer, tablet or phone — nothing to install.
- Your email address.
- Either an **invitation email** from your academy, or the platform URL to register yourself.

Your sidebar. Once logged in you'll see: *Dashboard, My Courses, Learning Paths, My Certificates, Live sessions, Leaderboard, Subscriptions, Preferences* — plus a **Help & guides** link at the bottom that opens this manual as a PDF whenever you need it.

2. Creating Your Account

2.1 If you received an invitation email

1. Open the email and click the **join link**.
2. Your email is pre-filled. Choose a password and confirm it.
3. Submit — you land directly on your dashboard. Done.

Didn't get the email? Check spam, then ask your administrator — they can copy your personal invite link and send it another way.

2.2 If you are registering yourself

1. Open the platform URL and click **Register**.
2. Enter your **name**, **email** and a **password**. Submit.

3. You are logged in immediately; click the link in the **verification email** within 24 hours (the in-app banner can resend it).

2.3 Logging in later

1. Click **Login**, enter email + password (and the 6-digit code if you've enabled two-factor authentication).
2. **Forgot your password?** Use **Forgot password** on the login page.

■ ■ If a full-screen **Terms & Conditions** page appears, read and click **Accept** — the platform stays locked until you do.

3. Your Dashboard

- **Your courses** with progress bars — click any card to continue exactly where you left off.
- **Learning streak** ■ — consecutive active days. Any real activity (slides, exams, flashcards) counts.
- **Points and badges** — earned automatically as you learn.
- **Upcoming live sessions** you've RSVP'd to.

4. Finding a Course

1. Open the **catalog**. Courses now show **cover photos**, category tags, duration — and an **amber star rating** (e.g. ★ 4.5 (12)) when other learners have rated them. Ratings come only from people who actually finished the course, so they're worth trusting.
2. Use the **search box**, **category/academy filters** and **sort** menu. The **Featured** row highlights courses the academy recommends.
3. Click a card for the detail page and the Enrol button.

Learning Paths: if courses are arranged in a path (Foundation → Intermediate → Advanced), finish one step to unlock the next.

Locked courses require a prerequisite course first — the detail page tells you which.

5. Enrolling

- **Free courses** — click **Enrol**; the course opens immediately.
- **Paid courses** — click **Enrol** → secure checkout → access activates on payment confirmation. Receipts live under **Subscriptions**.

■ In a test environment your academy may tell you to use the test card 4242 4242 4242 4242 (any future expiry/CVC). No real money moves.

6. Taking a Course

6.1 The course player

1. Open the course from **My Courses**.
2. Read each **slide**, then click **Next** (or the → arrow key). Progress **saves automatically** — leave any time, resume exactly where you were.
3. Some slides have **audio narration** — press play to listen.

6.2 Finishing — and rating the course

On the final slide you reach the **completion card**: ■ congratulations, any XP you earned, and a "**How was this course?**" star row.

- Click 1–5 stars to rate it — your rating helps other learners choose and gives your academy honest feedback. You can rate only after finishing, and clicking again later simply updates your rating.
- If the course has an exam, the button to start it is right there too.

6.3 The AI Tutor

Stuck on a concept? Click **Ask AI Tutor** inside any course, type your question, and get an answer built from your academy's own materials with **citations**. Save a useful answer as a flashcard with one click.

Privacy: tutor chats are private to you, and any personal information in your questions is automatically removed before AI processing.

6.4 Flashcards

If your course has flashcards, the review scheduler shows each card just before you'd forget it (spaced repetition). A few minutes a day beats cramming.

7. Live Sessions

1. Click **Live sessions** (or find them on the course page) and **RSVP**. For a repeating series, RSVP to one date or the whole series. RSVPing to a course you're not enrolled in **enrols you automatically**.
2. **Subscribe calendar** adds every session you RSVP to into Google/Apple/Outlook via your personal feed URL.
3. You get an **email reminder** before each session; join via the link on the session card. Attending can earn an **attendance certificate**.

8. Taking an Exam

1. Finish the slides, then click **Start exam** on the completion card.
 2. Before starting you see the **time limit**, **passing score** and your **remaining attempts** — the timer runs continuously once started.
 3. Answer the questions and **Submit**; your score appears instantly.
 4. **Passed?** Certificate issued immediately. **Failed?** Review the slides and flashcards and use another attempt.
-

9. Your Certificates

From **My Certificates** you can, for each one:

- **Download the PDF** — branded by your academy, QR code included.
- **Verify** — the QR/link opens a public page proving it's genuine; employers can check without an account.
- **Share** — a rich preview card, perfect for LinkedIn: *"I just completed..."*.

■ ■ If a certificate ever shows **REVOKED**, contact your academy administrator.

10. Streaks, Points, Badges & the Leaderboard

- **Streak** ■ — one meaningful activity a day keeps it alive; we email a nudge if it's about to break.
 - **Points (XP)** — for slides, exams and sessions.
 - **Badges** — unlock automatically at point thresholds.
 - **Leaderboard** — your rank in your academy. Compete kindly.
-

11. Sending Feedback

See a bug? Have an idea? Click the round **feedback button** in the bottom-right corner of any page:

1. Pick ■ **Bug**, ■ **Idea** or ■ **Other**.
2. Describe what happened (and what you expected).
3. **Send** — the page you were on is attached automatically, and your academy's admins see it in their feedback inbox.

No screenshots or emails needed — this is the fastest way to be heard.

12. Your Account & Settings

- **Change password** anytime in security settings; **two-factor authentication** is optional but recommended (store your recovery codes!).
 - **Preferences** — opt in/out of digest and reminder emails.
 - **Subscriptions** — payment history and active subscriptions.
 - **Your data (GDPR)** — request an export or account erasure; erasure anonymises your details while your certificates remain verifiable.
-

13. FAQ & Troubleshooting

My progress didn't save. Progress saves per slide automatically. Check your connection and reopen the course — you'll be on the last slide you completed.

I can't find the star rating. Ratings unlock on the completion card, after you finish every slide. If you want to change your rating later, finish-card stars update it in place.

I ran out of exam attempts. Attempts are limited by your academy — ask your administrator or instructor.

The exam timer ran out. The attempt submits with the answers you gave. If you have attempts left, prepare and retry.

I paid but the course won't open. Wait a few seconds and refresh — activation follows payment confirmation. Still locked? Check **Subscriptions**, then contact your administrator with the payment time.

I didn't get the verification / invitation / reset email. Check spam, use the resend option, then ask your administrator — they can send your link manually.

The AI Tutor gave a strange answer. It only knows your academy's materials. Rephrase, or read the citations.

Who can see my AI Tutor chats, ratings or feedback? Tutor chats: only you. Ratings: shown only as anonymous averages on the catalog. Feedback: your academy's admins (with your name, so they can follow up).

My streak reset and I'm sad about it. Fair. Even one flashcard review counts — start a new one today.
