

IFPI Learning Platform

Student User Guide · Version 2.0 · July 2026 · Complete first-time walkthrough

Version 2.0 · July 2026 — Complete first-time walkthrough

This is a step-by-step manual for learners. It assumes you have never used the platform before. Every instruction refers to the exact buttons and menus you will see.

1. What You Need

- A modern browser (Chrome, Edge, Firefox or Safari) on computer, tablet or phone — there is nothing to install.
- Your email address.
- Either an **invitation email** from your academy, or the platform URL to register yourself.

Your sidebar. Once logged in you'll see: *Dashboard, My Courses, Learning Paths, My Certificates, Live sessions, Leaderboard, Subscriptions, Preferences*. This guide covers each one.

2. Creating Your Account

2.1 If you received an invitation email

1. Open the email and click the **join link**.
2. Your email is pre-filled. Choose a password and confirm it.
3. Submit — you land directly on your dashboard, already a member of your academy. Done.

Didn't get the email? Check spam. Still nothing? Ask your administrator — they can copy your personal invite link and send it another way.

2.2 If you are registering yourself

1. Open the platform URL and click **Register** (top-right).
2. Enter your **name**, **email**, and a **password**. Submit.
3. You are logged in immediately, and a **verification email** is sent. Click the link in it within 24 hours. (A banner in the app lets you resend the email if needed.)

2.3 Logging in later

1. Open the platform URL, click **Login**, enter email + password.
2. If your account has two-factor authentication, also enter the 6-digit code from your authenticator app.
3. **Forgot your password?** Click **Forgot password** on the login page, enter your email, open the reset link you receive, choose a new password.

■ ■ If a full-screen **Terms & Conditions** page appears after login, read and click **Accept** — the platform stays locked until you do. This also happens whenever your academy publishes updated terms.

3. Your Dashboard

After login you land on **Dashboard**. What you see:

- **Your courses** with progress bars — click any card to continue exactly where you left off.
- **Learning streak** ■ — the number of consecutive days you've been active. Any real activity (slides, exams, flashcards) counts.
- **Points and badges** — you earn points (XP) for activity; badges unlock automatically at point thresholds your academy sets.
- **Upcoming live sessions** you've RSVP'd to.

4. Finding a Course

1. Open the **catalog** (from the dashboard or the public catalog page).
2. Use the **search box** to find a topic, the **category** and **academy** filters to narrow down, and the **sort** menu (newest / popular).
3. Click a course card to open its **detail page**: full description, estimated duration, price (if any), and the Enrol button.

Learning Paths: if your academy organises courses into paths (e.g. Foundation → Intermediate → Advanced), open **Learning Paths** to see the sequence and your position. Complete a step to unlock the next one.

Locked courses: some courses require a prerequisite course first. The detail page tells you which one.

5. Enrolling

5.1 Free courses

Click **Enrol** — that's it. The course opens immediately and appears under **My Courses**.

5.2 Paid courses

1. Click **Enrol** on the course detail page.
2. You are taken to a **secure checkout** — enter your card details and pay.
3. On success you land on a confirmation page and your access activates immediately. If the payment is still processing, the page updates by itself — if something goes wrong there is a **Retry** button.
4. Your receipts and active subscriptions live under **Subscriptions** in the sidebar.

■ In a test environment your academy may tell you to use the test card number 4242 4242 4242 4242 (any future expiry, any CVC). No real money moves in test mode.

6. Taking a Course

6.1 The course player

1. Open the course from **My Courses**.
2. Content is a sequence of **slides**. Read each one, then click **Next** (or use the → arrow key). **Previous** goes back.
3. Your progress **saves automatically** after every slide. Close the browser whenever you like — reopening the course puts you back exactly where you stopped.
4. Some slides have **audio narration** — press the play button to listen.
5. On the final slide you'll see the **completion card** — congratulations! If the course has an exam, the button to start it is right there.

6.2 Asking the AI Tutor

Stuck on a concept? There's a floating **Ask AI Tutor** button inside every course.

1. Click it — a chat panel slides out.
2. Type your question and press **Enter** (Shift+Enter makes a new line).
3. The tutor answers using your academy's own course materials, and shows **citations** for where each fact came from.
4. Useful answer? Click **Save as flashcard** under the reply — it joins your revision deck automatically.

Your tutor conversations are private to you. Any personal information in your questions is automatically removed before AI processing.

6.3 Flashcards (revision that actually works)

If your course has flashcards, open them via the **flashcards link** on the course page.

1. A card shows a question — think of the answer, then reveal it.
 2. Rate how well you knew it. The scheduler (spaced repetition) shows each card again *just before you'd forget it* — a few minutes a day beats cramming.
-

7. Live Sessions

1. Click **Live sessions** to see upcoming events, or find them on the course page.
 2. Click **RSVP** on any session you want to attend. For a repeating series you can RSVP to a single date or the **whole series**. - Bonus: if the session belongs to a course you're not enrolled in yet, RSVPing **enrols you automatically**.
 3. **Get it in your calendar:** click **Subscribe calendar** and add your personal feed URL to Google/Apple/Outlook — every session you RSVP to appears automatically. You can also download a single invite file.
 4. You'll receive an **email reminder** before each session. At the session time, click the **join link** on the session card.
 5. Your instructor marks attendance afterwards — attending can earn you an **attendance certificate**, issued automatically.
-

8. Taking an Exam

1. Finish the course slides, then click **Start exam** on the completion card (or via **Exams** on the course page).
 2. Before you start, the screen shows the **time limit**, the **passing score** (e.g. 70%) and **how many attempts** you have. Only start when you're ready — the timer runs continuously once started.
 3. Answer each question (multiple choice or true/false). The timer stays visible.
 4. Click **Submit**. Your score appears immediately.
 5. **Passed?** Your certificate is issued instantly (next section). **Failed?** Don't panic — review the slides and flashcards and use another attempt, up to the limit shown.
-

9. Your Certificates

Click **My Certificates** to see everything you've earned. For each one you can:

- **Download the PDF** — professionally branded by your academy, with a QR code printed on it.
- **Verify** — the QR code (and the verify link) opens a public page that confirms your certificate is genuine. Employers can check it without any account.

- **Share** — click share to get a link with a rich preview card, perfect for LinkedIn. Post it: *"I just completed ..."*.

■ ■ If a certificate page ever shows **REVOKED**, contact your academy administrator — certificates can be withdrawn (e.g. if issued in error).

10. Streaks, Points, Badges & the Leaderboard

- **Streak** ■ — do anything meaningful (a slide, a flashcard review, an exam) each day to keep it going. We'll email you a friendly nudge if your streak is about to break.
 - **Points (XP)** — earned for completing slides, exams and sessions.
 - **Badges** — awarded automatically as your points cross thresholds.
 - **Leaderboard** — click **Leaderboard** to see your rank in your academy. Compete kindly.
-

11. Your Account & Settings

- **Change password** — from your account/security settings, any time.
 - **Two-factor authentication (optional, recommended)** — enable it in security settings: scan the QR code with an authenticator app (Google Authenticator, Authy...), confirm with a 6-digit code, and **store your recovery codes safely** (each one works once if you lose your phone).
 - **Preferences** — click **Preferences** to opt in/out of digest and reminder emails.
 - **Subscriptions** — your payment history and active subscriptions.
 - **Your data & privacy (GDPR)** — you can request an export of your data or account erasure. Erasure anonymises your personal details while your issued certificates remain verifiable.
-

12. FAQ & Troubleshooting

The page says my progress wasn't saved. Progress saves per slide, automatically. Check your internet connection and reopen the course — you'll be on the last slide you completed.

I ran out of exam attempts. Attempts are limited by your academy. Contact your administrator or instructor to request more.

The exam timer ran out before I finished. The attempt is submitted with the answers you gave. If you have attempts remaining, prepare and try again.

I paid but the course won't open. Wait a few seconds and refresh — activation follows payment confirmation. Still locked after a minute? Check **Subscriptions** for the payment status, then contact your administrator with the time of payment.

I didn't get the verification / invitation / reset email. Check spam first, then use the resend option. If it never arrives, your academy's email may not be fully configured — the administrator can send your link manually.

The AI Tutor gave a strange answer. The tutor only knows what's in your academy's materials. Rephrase the question, or check the citations to read the source yourself.

Can other people see my AI Tutor chats or my scores? No. Tutor sessions are private to your account. Instructors and admins can see course progress and exam results (that's how they help you), but not your tutor conversations.

My streak reset and I'm sad about it. Fair. Streaks need one activity per day — even a single flashcard review counts. Start a new one today.
